Regenerative Gardening

Where We Began

Do you remember the first time you saw a majestic sunflower in bloom? The first time you grew a tomato from seed and nurtured it to harvest? The first time you dug your hands into rich, earthy soil? We have all felt that illuminating moment when we truly began our love of gardening. It's these collective experiences that bring us together as a community and inform our shared gratitude for our precious ecosystem.

The Next Generation

As we pass along our knowledge, passion, tools, determination and skills to the next generation, we know that we are not leaving them with the same world we began with. To ensure that we are not only preserving, but REGENERATING our soils, our gardens, and our world, we look to Regenerative Gardening practices that will help leave our planet in a better place for future generations.

What is Regenerative Gardening?

For us, Regenerative Gardening means gardening in a holistic way that regenerates the soil, our local ecosystem, and our planet. We encourage practices like composting garden debris and food waste, cover cropping, and no-till to keep the carbon in the ground—reducing our collective carbon footprint. Gardening that builds biodiversity in soils and plant life, eliminates the use of chemical fertilizers, and leaves the soil in a better place than it was found, is truly regenerative.

Ways We Support Regenerative Gardening

At Organic Mechanics Soil, we craft potting soils and soil amendments to revitalize our garden spaces. With repurposed ingredients like compost, organic nutrients, and carbon-negative biochar, we return these elements to the soil. The result is healthier soils, more resilient plants, better harvests, and more nutrient-dense foods for us to enjoy. As we grow, we will continue to innovate ways to reduce our environmental impact and partner with mission-aligned organizations, such as Rodale Institute. We hope you'll join us!

Proud Supporter of Rodale Institute

We're honored to be part of the "Proud Supporter of Rodale Institute" program! Rodale Institute, the nation's oldest, most trusted organization devoted to organic research and education, is partnering with select brands to create products that support regenerative organic agriculture.

This program recognizes farms and producers who go above and beyond in their material sourcing and farming practices. When you see the Rodale Institute logo, you know that the product was grown and produced in a way that supports healthy soil, healthy people, and a healthy planet.

"The Rodale symbol represents a partnership between a brand that values regenerative organic practices and Rodale Institute," says Jeff Tkach, Chief Growth Officer for Rodale Institute. "These partnerships allow us to be directly in a consumer's kitchen or garden, educating them about important farming practices that affect their everyday lives."

"We are excited for this opportunity to collaborate with Rodale Institute, as we share Rodale's passion for regenerative organic agriculture. Rodale Institute has been a pioneer in researching best practices in organic agriculture for almost a century, and we are proud to have Organic Mechanics products be selected."

— Mark Highland,
"The Organic Mechanic"

Who We Are

Founded in 2006, the Organic Mechanics Soil Company, LLC is a manufacturer and distributor of premier organic potting soils, soil amendments, and fertilizers for the professional and consumer gardening communities. Our retail products can be found in independent garden centers, houseplant shops, natural food stores, and indoor gardening stores. Our wholesale products ship to farms, growers, and landscape companies. We are proud to service most of the U.S., from the East Coast to the Southwest.

At the heart of all we do, we share a philosophy that embraces environmental sustainability and regenerative gardening practices. We are actively pursuing the dream of producing the highest quality, most earth-friendly organic potting soils, soil amendments, and fertilizers available.

This is why we choose to use biochar, compost, and coconut coir instead of peat (and rice hulls instead of perlite in most of our blends), bio-diesel to power our equipment, and recycled products and local ingredients whenever available. We are committed to operating our business responsibly and sustainably.

Factor in knowledgeable, personal service, the superior performance results you'll enjoy in your garden, and the ability to re-use our soil products a second growing season, and we hope you'll agree that Organic Mechanics is indeed the best potting soil you'll ever buy. Dig your hands into a bag of Organic Mechanics and start gardening... your plants will love you for it!

Mark Highland, "The Organic Mechanic"

Our Commitment to Sustainable Practices

We're Organic! We are committed to providing sustainably-sourced, organic ingredients for our products. Most of our products are OMRI Listed, independently verified as 100% Organic by OMRI (Organic Materials Review Institute). All of our products are NOP compliant (National Organic Program), so you can safely use them in organic gardening.

We're Peat-Free Peat, which consists primarily of decomposed plants, is a common ingredient in most potting soils. Peat is harvested from Peat Bogs, primarily located in Canada, which are some of the world's best carbon sequesters. Instead of taking that rich carbon from the ground, we choose to use ingredients that are byproducts of other processes, like biochar, coconut coir, and aged pine bark. With these materials, you're gardening with a much more sustainable product.

Water Less Many of our soil blends hold moisture longer than other brands, without adding chemicals, so you'll water less often. Ingredients like biochar, earthworm castings, and compost are a key part.

Reduce, Reuse, and Recycle It's not just the soil! We are consistently improving all parts of our business to be more sustainable and lower our carbon footprint. Our bag suppliers are getting closer to 100% post-consumer recycled plastic for our bags. The technology is almost there! For logistics, our primary trucking carrier was chosen partly because of their commitment to going green—they have solar arrays planned for each of their warehouses, and they source biodiesel for their truck fleet. Every bit helps!

OrganicMechanicSoil.com

Our Incredible Ingredients

- **Biochar** This carbon-negative ingredient is made from sustainably-harvested wood fiber. Biochar provides a home for biology and holds nutrients and minerals in the soil profile. It's a super yield booster for your plants that gives back year after year!
- **Compost** Our organic compost is locally-sourced and is made from plant materials (leaves, branches, cut-back perennials, etc.). The organic matter in compost encourages beneficial micro and macroorganisms in the soil food web, helping plants grow up strong. Compost helps retain moisture in our soils, too!
- **Aged Forest Products** Our locally-sourced, well-aged pine bark provides beneficial biology, chunkiness, and porosity to our soil blends. It also helps to provide drainage quality.

- **Coconut Coir** Coir is a superior medium for plant growth! It holds moisture longer than peat and doesn't break down as fast. Our coir is the material left at the end of sustainable coconut harvesting.
- **Rice Hulls** Super sustainable rice hulls are an ingredient that provides drainage like perlite. They contain phosphorous and a significant amount of silica. As the hulls break down, they create permanent pore space in your soil, which is great for root health!
- **Worm Castings** Our premium earthworm castings encourage beneficial biology and help with moisture retention. You'll find this incredible ingredient in many of our soils!

It's Alive!!! Living Soils bring life to your garden by enriching the soil's ecosystem with beneficial bacteria and fungi. The results: healthier plants, tastier harvests, and better for the earth!

OrganicMechanicSoil.com

For more info on Biochar,
turn to page 22!

Biochar Blend

- Contains: Biochar, compost, earthworm castings, bone char, azomite, zeolite, alfalfa meal, and kelp meal.
- Lifetime Soil Enhancement that Grows Big Plants and Increases Yields!
- Fully charged and ready to use on all types of plants.
- Compost and earthworm castings encourage beneficial biology.
- Alfalfa Meal and Kelp Meal add valuable nutrients.
- Bone Char adds necessary phosphorous and calcium.
- Zeolite and Azomite are minerals that nourish microbes and plant roots.
- For Containers, mix in at a 10% rate with your preferred growing media, such as our Container Blend Potting Soil or Cocodelphia.
- For Garden Beds, a 1 cu. ft. bag will amend 24 square feet (10% rate).
- Natural and Organic!
- Recommended for Cannabis and Hemp!
- Available in 8 qt. and 1 cu. ft. bags.

OrganicMechanicSoil.com

Insect Frass Fertilizer (3-2-2)

- Contains: Insect frass.
- 3-2-2 organic, vegan fertilizer for amending soils and nourishing plants.
- Use in soil and potting soil, or as a liquid foliar spray, or additive into a compost tea / hydroponic program.
- For Containers, mix 1 cup per 1 cu. ft. of soil. Mix 0.25 cups with 1 cu. ft. of soil for young plants, and up to 1 cup for established plants.
- For all stages of plant growth.
- Perfect for all plant types: Houseplants, Edibles, Flowers, Native Plants, Tropicals, Trees, Bonsai, Cacti & Succulents, and Bulbs.
- All Natural, made with Organic Ingredients.
- Recommended for Cannabis and Hemp!
- Available in 2 lb. bags.

Use this natural and organic fertilizer in soil or potting soil. Makes a great liquid foliar spray or addition to compost teas.

A Level Up on the classic 70:30 Blend, plus all the ingredients in our incredible Biochar Blend!

110 Blend

- Contains: Coir, perlite, biochar, compost, earthworm castings, bone char, azomite, zeolite, alfalfa meal, and kelp meal.
- Well-drained soil providing peak aeration, it's ready to plant straight outta the bag!
- Fully Charged and ready to use on all types of plants.
- Boosts your Yields and Terpene content!
- Ingredients encourage beneficial biology, add valuable nutrients including phosphorous and calcium, and add minerals that nourish microbes and plant roots.
- Natural & Organic!
- Recommended for Cannabis and Hemp!
- Available in 1.76 cu. ft. (50 Liter) bags.

OrganicMechanicSoil.com

Cocodelphia – 100% Premium Coconut Coir

- Triple-Washed for Low Salt Levels! EC less than 0.7.
- Ready to Use – This growing medium is good to go! If desired, mix in beneficial ingredients, such as Biochar Blend, Insect Frass, or Worm Castings, to make your own super soil.
- pH neutral to slightly acidic.
- Contains excellent Cation Exchange Capacity (CEC) for improved fertilizer uptake.
- 100% Organic – Can be reused!
- Recommended for Cannabis and Hemp!
- Available in 1.76 cu. ft. (50 Liter) bags.

For use as a grow media in hydroponic grow systems, container plantings, and in garden beds!

OrganicMechanicSoil.com

Ideal potting soil for growing food in containers, annuals, tropical plants, and house plants.

Premium Blend Potting Soil

- Contains: Compost, aged forest products, coir, earthworm castings, and perlite.
- Our Original Blend, perfect for small containers, window boxes, or any plant that needs exceptional moisture retention!
- Cut your watering time in half! Our compost-based mix retains moisture much better than traditional peat-based mixes, so you'll water less often.
- Harvest twice as much! Research trials show tomatoes grew twice as large, with twice as many fruits when grown in Premium Blend, compared to our competition.
- For optimal plant growth, pair with a complete, balanced fertilizer at planting time.
- Available in 8 qt., 16 qt., and 1 cu. ft. bags.

OrganicMechanicSoil.com

Container Blend Potting Soil

- Contains: Compost, aged forest products, coir, earthworm castings, and rice hulls.
- Excellent drainage properties, yet holds moisture well over time.
- Use for large containers (up to 250 gallons) or any plant that needs well-drained soil.
- Perennials and heavily flowering plants love it!
- Save money and reuse it! Our compost-based soils do not break down as quickly as peat-based mixes. Simply fluff the mix back up, remove any large root balls, and then replant.
- For optimal plant growth, pair with a complete, balanced fertilizer at planting time.
- Recommended for Cannabis and Hemp!
- Available in 16 qt., 1 cu. ft., and 2 cu. ft. bags.

Our all-purpose, 100% organic potting soil, perfect for repotting plants, indoor gardening, and more!

OrganicMechanicSoil.com

Perfect for any type of
Cactus or Succulent!

Cactus & Succulent Blend

- Contains: Biochar, expanded shale, rice hulls, compost, earthworm castings, sand, and coir.
- Our unique blend is scientifically designed for amazing drainage, yet holds enough moisture to keep your cacti and succulents happy.
- Also works for bonsai trees, jade plants, or any plant that needs exceptional drainage.
- Biochar helps to retain biology in the root zone.
- We recommend using terracotta (clay) or fiber containers for best results.
- All Natural, made with Organic & Mineral Ingredients.
- Available in 2 qt. and 8 qt. resealable bags.

OrganicMechanicSoil.com

Seed Starting Blend

- Contains: Coir, aged forest products, rice hulls, earthworm castings, and an OMRI Listed organic fertilizer.
- Use for vegetables, herbs, annuals, and perennials.
- Formulated for optimal seed germination, providing 3-4 weeks of fertilization power.
- Holds moisture, yet drains well for healthy root growth.
- Use in seedling flats, small fiber pots, or any container for planting seed.
- Recommended for Cannabis and Hemp!
- Available in 8 qt. and 16 qt. bags.

The perfect 100% organic potting soil for starting all types of seeds. Sow your seeds and grow your own food this season!

OrganicMechanicSoil.com

A 4-2-2 fertilizer with
Mycorrhizae & highly
beneficial additives.
Grow BIG plants and
INCREASE your yields!

Fuhgeddaboutit! Root Zone Feeder Packs (4-2-2)

- Contains a measured dose of fertilizer, mycorrhizae, biochar, azomite, and micronized oyster shell.
- No mixing and measuring, just add at planting time, right beside or just underneath the plant's root ball. Nothing could be easier. Fuhgeddaboutit!
- Use 1 per plant. If planting in larger than a 5 gallon container, use 1 pack for every 5 gallon size.
- For all types of plants, from annuals to perennials to woody plants.
- Enhances your existing fertilizer program. Contains a 4-2-2 fertilizer, 5% Calcium and 1% Sulphur.
- All Natural, made with Organic & Mineral Ingredients.
- Recommended for Cannabis and Hemp!
- Standard Size contains 12 50-gram packs in a resealable bag.
- Available for bulk purchases.

OrganicMechanicSoil.com

Pure Rice Hulls

- Contains: 100% Pure Rice Hulls.
- Perlite Substitute: Mix into your soil to increase drainage and porosity. Use 10% less Rice Hulls than you would with perlite!
- Fungus Gnat Deterrent: Make your plants a place they don't want to go! Add 0.5"-0.75" to the top of your soil as a mulch.
- Weed Control: Stop weeds from growing and wasting your time weeding! Add 1.5"-2.0" to the top of your soil as a mulch.
- Home Brew Helper: Works to ensure full flavor release for your beer.
- Grown, Harvested, and Packaged in the USA!
- Recommended for Cannabis and Hemp!
- Available in 8 qt. (resealable) and 2 cu. ft. bags.

[OrganicMechanicSoil.com](https://www.OrganicMechanicSoil.com)

Use as a perlite substitute,
fungus gnat deterrent, and
weed control!

For vegetable gardens, trees,
shrubbery, fruits and flowers.
Revitalize your soil this
growing season!

Planting Mix Compost Blend

- Contains: Compost, aged forest products, coir, and earthworm castings.
- Incredible soil amendment that revitalizes your garden soil.
- Works great in raised bed gardens (Mix 3 parts Planting Mix Compost Blend to 1 part topsoil).
- Adds vital organic matter to enhance the root zone.
- Helps retain moisture around plant roots.
- Give your new plants a healthy advantage with this superior quality organic planting mix!
- For optimal plant growth, pair with a complete, balanced fertilizer at planting time.
- Available in 1 cu. ft. and 2 cu. ft. bags.

OrganicMechanicSoil.com

Organic Hardwood Bark Mulch

- Contains: organic hardwood bark mulch and organic compost.
- We blended hardwood bark mulch and compost to give you a dark rich mulch layer that looks great in your garden.
- All natural, organic mulch is safe to use around kids and pets.
- Bark mulch builds your soil's organic matter as it breaks down.
- Compost replenishes your soil and encourages beneficial biology.
- Available in 2 cu. ft. bags.

Perfect for mulching
any garden area!

OrganicMechanicSoil.com

Nature's organic fertilizer!
These 100% organic earthworm castings replenish your soil and encourage beneficial biology.

Worm Castings Soil Amendment

- Contains: 100% Pure Earthworm Castings.
- Use as a soil amendment for vegetables, herbs, annuals, perennials, or houseplants.
- Water less! Worm Castings help hold moisture in the root zone.
- Rejuvenate houseplants! Add 1/4 cup of Worm Castings per gallon pot to soil surface.
- Give new plants a head start! Mix 1/4 cup of Worm Castings into soil planting hole for each vegetable in garden beds.
- Recommended for Cannabis and Hemp!
- Available in 1 lb. and 5 lb. resealable bags.

OrganicMechanicSoil.com

Wholesale-Specific Blends

Need soil for your greenhouse, nursery, or landscape design / build firm? We blend custom soils to spec and offer larger wholesale sizes and packaging on all our soil blends. **Typical sizes are 2 cu. ft. bags, 60 cu. ft. super sacks, and traditional Bulk.** Private labeling is available as well. Contact your sales representative for quotes and details.

Professional Grower's Blend

- Contains: coconut coir, aged forest products, rice hulls, earthworm castings, compost, and an OMRI listed organic fertilizer, providing a 30-day starter charge.
- Well-drained blend great for annuals, vegetables, perennials, and tropicals.
- Built for greenhouse use or for large architectural planters.
- Fertilize as needed for best results.
- **Also available with our Biochar Blend premixed in!**
- Available in 2 cu. ft. bags and 60 cu. ft. super sacks.

Stormwater Blend

- Contains sand, topsoil, compost, biochar.
- For Green Stormwater Infrastructure (GSI) projects that require an engineered soil with specific drainage properties.
- Drains well, excellent infiltration rate yet holds moisture to support plant growth.
- Used by Pennsylvania Horticulture Society's (PHS) Rain Check Program.
- All Natural, made with Organic & Mineral Ingredients.
- Available in 1 cu. ft. bags.

Why Biochar?

Biochar: *Bi-o-char* is highly porous carbon that improves nutrient absorption and provides a practically permanent home for beneficial soil biology. Proper use will boost yields and increase the effectiveness of your grow!

Why Biochar? Biochar is a carbon negative material that can help reduce our carbon footprint by sequestering carbon in the ground for up to 1,000s of years. Made from an ancient technology with its roots in the Amazon over 2,000 years ago, Biochar is created through a process called pyrolysis. When properly used, Biochar will help to boost yields and increase the effectiveness of your grow! Biochar is an incredible garden tool that makes soil more fertile by increasing nutrient holding capacity. Biochar also helps in moisture retention and has been used for soil contaminant remediation.

Simply put, you're going to have a healthier and more vibrant garden when properly using Biochar. **You'll get year-after-year benefits from this lifetime soil amendment.**

We offer our Biochar products in 1 cu. ft. bags, as well as in super sacks (bulk). 100% Biochar and our unique Biochar Blend (also in retail bags) are both available.

Our Fuhgeddaboudit! Root Zone Feeder Packs are another Biochar-based product, available in retail packaging or in bulk for landscape use.

OrganicMechanicSoil.com

100% Biochar

- We recommend mixing your desired nutrients, biology, and minerals with Biochar for a minimum of four weeks before using it. This allows time for the Biochar to become inoculated.*
 - Biochar improves soil quality for a lifetime, so soil performance gets better year after year!
 - For Containers, mix in at a 5% rate with your preferred growing medium, such as Container Blend or Cocodelphia.
 - For Garden Beds, 1 cu. ft. will cover 48 sq. ft. at a 5" depth (5% rate).
 - Natural and Organic!
 - Available in 1 cu. ft. bags and 60 cu. ft. super sacks, and bulk!
- Reach out to us directly for bulk pricing.**

*Skipping the inoculation step reduces effectiveness the first year, as Biochar will adsorb nutrients and minerals from the surrounding soil, reducing plant-available nutrients in the soil solution. Work with a pre-inoculated Biochar Blend for best results. However, in some landscape situations, blending pure Biochar into soil has advantages that outweigh this limitation.

OrganicMechanicSoil.com

Growing Cannabis & Hemp

From Multi-State Operators to backyard hobbyists, experienced growers across the nation trust Organic Mechanics for their Cannabis & Hemp production. We are proud to have Cup Award Winners use our products for their amazing grows. For best results, look for our products listed as "Recommended for Cannabis & Hemp!" on their product page.

Please note that Organic Mechanics is not responsible for the use of our products in states where growing and using cannabis is prohibited. Requesting information, or purchasing any of our products, implies that you intend to use it in a lawful manner. Organic Mechanics disclaims all liabilities.

A custom Organic Mechanics blend was used exclusively for Split-Rocker, a living sculpture, at Rockefeller Center in NYC. Another version of Split-Rocker currently lives at the Glenstone Museum in Potomac, MD.
